

Age Spot Removal Cream Shares the Secret through New Website Launch

Household expert in age spot removal cream and skin care is now divulging the secret to a blemish free skin through the launch of her website.

Melbourne, Victoria, Australia -04 November 2012- Household guru in age spot removal is now sharing her secret through the launch of her new website [Age Spot Removal Cream](http://agespotremovalcream.com/) <http://agespotremovalcream.com/> .

Age spots or technically known as “solar lentigines” are one of the multiple consequences of excessive exposure to the sun or on the skin of people who use tanning beds and sun lamps (devices that also emits UV rays like the sun). It is characterized as colored areas in brown or grayish pigment that ordinarily appears in the face, neck, hands and chest.

According to research, most individuals affected by age spots are after the age of 40 (though it can also appear on younger people). Age spots make one look older and even unhealthy. With that in mind, [Age Spot Removal Cream](http://agespotremovalcream.com/) has launched its new website in order to help people afflicted with this ageing condition, supervised by skin care guru Martina Gerste.

Though technically harmless, dermatologists use for aesthetic or cosmetic reasons different treatments to lighten or remove age spots, such as: microdermabrasion, laser treatments, chemical peels, skin bleaching products and more. But [Age Spot Removal Cream](http://agespotremovalcream.com/) presents a different but effective treatment through IronPower’s NiaSerum and Acnessential skin products.

These products are proven to be some of the best age spot removal creams in the market plus guaranteed to have no side effects. The main component to these products is Niacinamide that has the ability to moisturize the skin and remove signs of ageing specifically wrinkles and age spots.

Acnessential aside from its whitening capability promises to even out skin tone in three to four weeks of regular use plus it rejuvenates the skin thus eliminating another sign of ageing which is dryness.

NiaSerum has tripled the strength of niacinamide (12%) as Acnessential cream (4%) which means faster results. It is in serum form and can penetrate the skin including the deeper layer. You can also use the two products in tandem.

Find out the solution to your age spots and other anti-ageing treatments and skin care tips in an easy to use website <http://agespotremovalcream.com/> . For more information, visit the site now.
